Ahmed Galal Mohamed

0110 484 6214 | Cairo | Ahmedgalal.hti@gmail.com | linkedin.com/in/ahmed-galal

Objective

Detail-oriented Data & Cybersecurity Specialist with expertise in Data Engineering (ETL pipelines, Apache Airflow), Relational Databases, and Penetration Testing (Nmap, Linux). Proficient in Python, SQL, and C++. Seeking an entry-level position to apply technical skills in optimizing, securing, and managing data infrastructure.

Education

Higher Technological Institute (HTI)
Bachelor of Science in Computer Science – General Grade: Good *Sep 2029*

Work Experience

IT Support Specialist Feb 2026 – Oct 2026
Elshams Farm *Zagazig*

- Managed local network infrastructure, system security protocols, and overall hardware/software operations on Linux and Windows environments
- Monitored relational database performance (SQL), handled user access controls, and executed periodic data maintenance
- Conducted basic system vulnerability assessments using tools such as Nmap and applied security patches to mitigate operational risks
- **Key Achievements:** Optimized network database access speeds and automated system backup workflows using custom Python scripts

Data Engineering Nov 2025 – Present
Digital Egypt Pioneers Initiative (DEPI) *Online*

- Enrolled in an intensive data engineering program focused on building end-to-end data pipelines and database architecture
- Developed relational database systems using SQL and Python to clean, transform, and manage large datasets
- Designed and orchestrated ETL workflows with Apache Airflow, including scheduling, task dependencies, and failure handling
- Built web scraping scripts in Python to collect and structure data from external sources for downstream pipelines
- Applied foundational cybersecurity principles to secure data workflows and assess pipeline vulnerabilities
- **Key Projects:** Built automated ETL pipelines using Python and Airflow, and designed relational schema models for scalable analytics

Courses & Certificates

Data Engineering Track 07/2026 – Present
Data Engineering / DEPI

- Learning data pipeline architecture, ETL processes, workflow orchestration with Apache Airflow, and relational database management
- Gaining hands-on skills in Python and SQL for data extraction, transformation, and storage, including web scraping techniques

Python Programming & Problem Solving 03/2026 – 06/2026
HackerRank (Online)

- Covered Python programming fundamentals, data structures, and object-oriented programming concepts
- Earned HackerRank Problem Solving / Python Certification by successfully completing hands-on coding challenges

ICPC Community

- Covered C++ fundamentals, object-oriented programming (OOP), and core data structures
- Applied algorithms and problem-solving techniques to solve competitive programming challenges

Project

Keystroke Logger & Credential Tracker | *Python, File Handling, Cybersecurity* 04/2026

- Developed a security testing tool using Python to monitor and capture keyboard inputs and system interactions
- Programmed functionality to automatically detect target authentication fields and map captured credentials to specific website domain names
- Implemented secure local file handling and structured log output for analyzing system input vulnerabilities

Network Reconnaissance & Vulnerability Scan | *Nmap, Linux, Python* 2026

- Performed host discovery, port scanning, and service/version detection on local networks using Nmap
- Used Linux command-line tools to analyze scan results and identify potential misconfigurations and open ports
- Documented findings into a vulnerability report with recommended mitigation steps

Automated ETL Pipeline with Airflow | *Python, Apache Airflow, SQL, Web Scraping* 2026

- Built a scheduled ETL pipeline orchestrated with Apache Airflow DAGs to extract, clean, and load data into a relational database
- Developed Python web scraping scripts to collect raw data from external websites as a pipeline data source
- Applied problem-solving techniques to debug task failures, optimize DAG scheduling, and improve pipeline reliability

Technical Skills

Languages: Python, C++, SQL, NoSQL
Data Engineering: Apache Airflow, ETL Pipelines, Web Scraping, Relational Database Design
Cybersecurity: Nmap, Vulnerability Assessment, Network Security, Linux Administration
Office: Microsoft Office (Word, PowerPoint, ...)
Web: HTML, CSS, JavaScript

Language

Arabic: Native
English: A2

Soft Skills

Problem Solving, Analytical Thinking, Teamwork, Time Management

Extracurricular Activities

Student Union Member & Event Organizer Nov 2025 – Present
HTI Student Union, Higher Technological Institute

- Co-organized and managed "Clash of Code," a competitive multi-university data analysis competition
- Coordinated logistics, participant registrations, and event scheduling for student teams across multiple universities
- Collaborated with union members and academic advisors to ensure smooth competition workflow and technical setup
- Facilitated communication between participants and judges, managing an engaging event environment for 100+ attendees

Representative Aug 2026 – Sep 2026
Universities Forum

- Represented the Computer Science department on behalf of the Faculty at the Universities Forum
- Engaged with visitors and students to present the department's academic specialization, technical projects, and career tracks
- Demonstrated communication and public speaking skills while serving as an official spokesperson for the college
