PROFESSIONAL SUMMARY

Entry-level Data Engineer and Cybersecurity enthusiast with hands-on experience building ETL pipelines with Apache Airflow, designing relational databases (SQL), and running network vulnerability assessments with Nmap on Linux. Proficient in Python, SQL, and C++. Experienced in teaching programming and presenting technical topics to groups. Seeking an entry-level Data Engineer or Security Analyst role.

TECHNICAL SKILLS

- **Languages:** Python, SQL, C++, NoSQL, HTML, CSS, JavaScript
- **Data Engineering:** Apache Airflow, ETL Pipelines, Data Pipelines, Web Scraping, Relational Database Design, Data Modeling, Data Cleaning and Transformation
- **Cybersecurity:** Nmap, Vulnerability Assessment, Network Security, Penetration Testing Fundamentals, Linux Administration, Access Control
- **Operating Systems:** Linux, Windows
- **Spoken Languages:** Arabic (Native), English (A2)

WORK EXPERIENCE

IT Support Specialist | Elshams Farm, Zagazig | Feb 2026 - Oct 2026

- Managed local network infrastructure and system security across 200+ users/devices on Linux and Windows.
- Monitored SQL database performance, managed user access controls, and performed scheduled data maintenance.
- Conducted vulnerability assessments with Nmap and applied security patches, reducing operational risk.
- Automated system backup workflows with custom Python scripts, eliminating manual backup work.
- Optimized network database access speeds.

Data Engineering Trainee | Digital Egypt Pioneers Initiative (DEPI), Online | Nov 2025 - Present

- Completing an intensive data engineering track covering end-to-end data pipelines, ETL, and database architecture.
- Built relational databases with SQL and Python to clean, transform, and manage datasets of 50,000+ records.
- Designed and orchestrated ETL workflows in Apache Airflow, including scheduling, task dependencies, and failure handling.
- Developed Python web scraping scripts to collect and structure data from 4 external websites for downstream pipelines.
- Applied cybersecurity principles to secure data workflows and assess pipeline vulnerabilities.

Programming Instructor | Baccalaureate Students (Grades 1 and 2), In-person and Online | Oct 2026 - Present

- Teach programming fundamentals to 40 baccalaureate students through in-person and online sessions.
- Plan lessons, explain technical concepts clearly, and track student progress.

PROJECTS

Automated ETL Pipeline with Airflow | Python, Apache Airflow, SQL, Web Scraping | 2026

- Built a scheduled ETL pipeline using Airflow DAGs to extract, clean, and load data into a relational database.
- Wrote Python scraping scripts to collect raw data from external websites as the pipeline source.
- Debugged task failures, optimized DAG scheduling, and improved pipeline reliability.

Network Reconnaissance and Vulnerability Scan | Nmap, Linux, Python | 2026

- Performed host discovery, port scanning, and service/version detection on local networks using Nmap.
- Analyzed results with Linux command-line tools to identify open ports and misconfigurations across 20 hosts.
- Produced a vulnerability report with prioritized mitigation recommendations.

Keystroke Monitoring Proof-of-Concept (Educational Security Lab) | Python, File Handling, Cybersecurity | Apr 2026

- Built a proof-of-concept tool in an isolated lab environment to study input-capture vulnerabilities and detection methods.
- Implemented structured logging and secure local file handling to analyze how such tools behave.

EDUCATION

Higher Technological Institute (HTI) | B.Sc. in Computer Science | Expected Sep 2029 | Grade: Good

CERTIFICATIONS AND TRAINING

- **Python Programming and Problem Solving** - HackerRank | Mar 2026 - Jun 2026 | Problem Solving (Python) Certificate

LEADERSHIP AND ACTIVITIES

Student Union Member and Event Organizer | HTI Student Union | Nov 2025 - Present

- Co-organized "Clash of Code," a multi-university data analysis competition for 100+ attendees.
- Coordinated registrations, logistics, and scheduling across multiple universities.

Representative, Universities Forum | Aug 2026 - Sep 2026

- Presented the Computer Science department's programs, projects, and career tracks to visitors and students as an official spokesperson.
